

A circular diagram illustrating the dimensions for a circular print. It features a central red circle with a diameter of 106 mm. This is surrounded by a larger, light red circular area representing the bleed zone. The distance from the center of the inner circle to the outer edge of the bleed zone is also 106 mm. A thin red line, labeled as the 'CUTTING LINE', is positioned between the inner circle and the bleed zone. Four arrows point outwards from the cutting line to the bleed zone, each labeled 'BLEED (3mm)'. In the center of the diagram, there is a list of instructions and a note about centering the design.

BLEED (3mm)

CUTTING LINE: 

FILE SIZE WITH BLEED: (106x106)

PLEASE SEND US 2 FILES:

1. **PRINT FILE** WITHOUT CUTTING LINES (EXAMPLE AT PAGE 2)
2. **PREVIEW FILE** WITH CUTTING LINES (EXAMPLE AT PAGE 3)

DESIGN HAS TO CENTERED!
